Bang Chan

Houses in the village vary considerably in appearance: from the bamboo and thatch dwellings of the poorest families to the sturdy, great gabled houses of teak built by Bang Chan's original settlers to the tiled and corrugated iron-roofed homes of the newly rich. Most, however, follow the traditional Siamese pattern of being built on posts two to ten feet off the ground, mainly as a protection against flood waters. Many homes in Bang Chan give the impression of being permanently unfinished, the bamboo houses because they require constant refurbishment, the wooden dwellings because they are made of teak which seasons best when left untreated and exposed directly to the elements. The merging upper-class urban pattern of painting teakwood has not yet reached Bang Chan.

The major thoroughfare of the community, bisecting it in a north-south direction and perpendicular to the Bangkok-Minburi highway, is Khlɔɔŋ (or Canal) Bang Chan, which links with Khlɔɔŋ Sɛɛn Sɛɛb three kilometers south of the village. The latter, dug in the 1840's and originally intended as a military route to the Cambodian frontier, is one of several major canals dug during the mid-nineteenth century as part of the vast canal system that was constructed in the Central Plain when the region was opened for commercial rice production. Together with the highway built since World War II, a one-hour bus ride to the capital, Khlɔɔŋ Sɛɛn Sɛɛb, provides the villagers with their major access to Bangkok and the rest of the Central Plain. By motorboat a trip to Bangkok via this large, bustling canal takes approximately three hours.

Despite these relatively good communications facilities and the long-standing Thai peasant tradition to *paj thiaw* ("to go around"—for fun, on visits, pilgrimages, often for long distances) few people outside the immediate vicinity of the village have ever heard of Bang Chan. The community is neither a landmark nor is it located near one; it is not famed for any activities (other than having become the research site for the "American professors"); and because it is not a spatially integrated village, Bang Chan cannot even be found on any map of Thailand. Like most Thai settlements, Bang Chan has a Buddhist monastery and a government elementary school. It is these two structures that give the village its identity and the local people a sense of belonging to a community. People say that they live "at home in Bang Chan" because they make their merit at the monastery of Bang Chan and send their children to the Bang Chan school. Approximately five square miles in size and inhabited by 1,771 people living in 296 households (1956 village census), Bang Chan seems in physical appearance and social significance like the thousands of other communities that dot the rice fields of the great Central Plain.

To what extent Bang Chan may be considered "typical" in an analytic sense of other villages of the Mɛɛnaam Valley, or even of the country as a
